

## Enhanced Reference List of Cochrane Review Protocols

Selected by the Cochrane Neurological Network  
Published in the Cochrane Library (CL) through Issue 3, 2006

This database of **COCHRANE REVIEW PROTOCOLS** contains titles - in alphabetical order - of protocols - *of neurological interest* - published in the Cochrane Library through Issue 3, 2006. They were selected and compiled by the Cochrane Neurological Network.

The standard path for registering a systematic review is the registration of the title, the submission of the protocol and, finally, the completed review.

These protocols are divided by disease category according to the Index of Diseases created and maintained by the Cochrane Neurological Network.

See the Index of Diseases - in alphabetical order - with the corresponding number of protocols that can be found in this list.
